# 1 Project Contract

While an effort will be made to meet all requirements stated in the requirements document, the final version of Tip of My Shoe is guaranteed to:

1. Support user interaction via a website and/or mobile app(s).
2. Accept a user photo.
3. Identify, to a reasonable certainty, whether or not the image is of a shoe.
4. Reject a user-provided image if it is not a shoe, or if it is not of suitable quality for proper processing, and notify the user accordingly.
5. Attempt to match shoes via user-provided images using a pre-existing database of high fashion and well-branded shoes. If no match can be made, the user will be notified as such.
6. If a match is made, identify the shoe and give information on it (i.e. Brand, model, etc.).
7. Provide links to where the user can potentially purchase any successfully matched shoe.
